Name: _____

Volunteer Record Card

Organization/Activity	Date	Amount of Time	Supervisor Signature

Extra Curricular Activities and Community Service are an important part of life in general. While this is not a graduation requirement from High School, participation in outside activities (either school based or in the greater community) can help round out a student in terms of applications for colleges and careers.

Some students choose to get letters of participation or keep a volunteer "card" to record hours and duties from their volunteer activity to keep in their portfolio as "evidence". Technically, the school does not have an "official" method of record keeping as it is not required. However, this is an example for your use of reference in creating your own (available in the Counseling Office or for download on our Counseling Website).

Most important is the quality of the participation, not the number of activities. Students should focus the things they are interested in, what they learn from the experience and how they are able to participate in their greater community.
